

Sources: 50MGC galaxies

- Selected from 50MGC catalog (galaxies within 50 Mpc, [Ohlson et al. 2023](#))
- brightest ($F_{0.5-2} > 10^{-12}$ erg/s/cm²) in X-ray, host AGNs (active galactic nuclei)
- have not been observed by Chandra/ACIS

Note:

- ✧ Most of them are well studied in other wavebands, and you are encouraged to find additional information about your source from the literature.
